YOUR CATEGORY:

Adirondack Furniture Kits

How can you furnish a room when its' ceiling is the sky? **KitGuy** links you to a **wide selection of quality-crafted, classic Adirondack furniture kits** to enhance your yard, patio, deck, porch and garden.

Amazingly, there are several different styles of **Adirondack furniture** to choose from, including the Fanback and Westport designs. The real beauty of these century-old **furniture** designs starts with their classic good looks and ends with how good you feel when lounging in the curved, comforting lines of these masterpieces you easily construct yourself.

Choose from **adult and children's chairs, rockers, footrests, end tables, coffee tables** and more. Most kit manufacturers offer their **furniture** in your choice of pine, cypress or rot-resistant cedar. If you want another kind of wood, you can place a special order. The lumber is all ready for easy assembly, painting or sealing. Some wood comes pre-sanded, too.

Many manufacturers also offer a variety of other outdoor furnishing and decorating kits, including **wishing wells, trellises, picnic tables, swings** and more. **KitGuy** brings you everything under the sun for relaxation and enjoyment of your outdoor living space where your ceiling is the sky!

Kompleteness of Kits/Tools: All kits include pre-cut, routed, drilled lumber; easy-to-follow directions; galvanized or zinc-plated hardware and glue. Some kit manufacturers offer a choice of unassembled or assembled kits.

Finishing: All kits come in unfinished wood; some of it is pre-sanded. Paints, stains and sealers are extra.

Skill: No experience is necessary. One kit maker promises that all you need is a screwdriver and one hour to assemble your furniture. Get going!

Price Range: Prices depend on the piece of Adirondack furniture you're making. A simple footrest starts as low as \$24. A love seat goes for \$124. Shipping is extra. Online ordering varies. Some follow-up with a phone call; most accept credit cards and personal checks.

SEE SPECIFIC KITGUY PROFILES LISTED ON THE TOP RIGHT OF THIS PAGE THAT WILL LINK YOU TO THE ADIRONDACK FURNITURE KITS AVAILABLE ONLINE.

Adirondack Furniture Kits ▶ All Things Cedar

ALL THINGS CEDAR makes kits out of cedar – specializing in **Adirondack** chairs and outdoor furniture. They offer a nice range of **porch swings and gliders** too. Cedar is an excellent material for outdoor furniture because it will resist rot and decay and the cedar aroma is a deterrent to insects and other pests. When you finish one of their kits you know it will feel good and look great for a long, long time.

Their **Adirondack furniture** includes a **children's chair, adult chair with optional ottoman, and loveseat**. They offer the unique option of both partially assembled and completely disassembled kits. The disassembled kits are much less expensive and come as totally knocked-down components.

Kits include pre-fit components, all cedar construction, predrilled holes, zinc-plated hardware and a fully sanded finish. Because all of the components are precut and predrilled these items can be assembled in just a matter of hours. They are located in Alberta, Canada.

Adirondacks:

Adult chair kit - \$89 plus shipping

Note: The ottoman for the adult Adirondack chair is only \$27 and when the ottoman is ordered along with the Adirondack chair you save \$10 on the set and also receive free shipping, so **the total Adirondack chair and ottoman kit including shipping is about \$136 - a super value.**

Children's chair kit - \$49 plus shipping

Loveseat kit - \$124 plus shipping

Porch swing: unassembled kit - \$129 plus shipping;

Glider/rocker assembled kit only - \$264 plus shipping

Shipping is about \$24.95 per item.

The partially assembled kits add approximately 20% to these prices.

Note: Prices are estimates in US Dollars - features, specifications and prices are subject to change - check with kit manufacturer.

Availability: Usually ship in 48 hours 5 to 9 days for delivery

ASSEMBLY INFORMATION

[TOP ▲](#)

Tools Required: Common household

Skills Needed: Low-level mechanical and finishing

Areas of Difficulty: Finishing – if preferred

Estimated Time: Anywhere from 15 minutes to a couple of hours

Finishing Required: Can be left to weather naturally and will turn a nice silver-gray. Staining and/or

sealing is recommended to preserve the cedar color and this manufacturer recommends a specific type of wood sealer called *Thompson's Wood Sealer* because it does not raise the grain. They do not recommend painting unless the furniture is used in a sheltered area due to the nature of the cedar wood a sealed finish can cause pressure resulting in blistering and peeling stains are generally breathable and will not trap moisture.

YOUR CATEGORY:

Birdhouse, Birdfeeder & Wildlife Feeder Kits

The assortment of **birdhouse and birdfeeder kits** is impressive. Some kit manufacturers also offer specialty **wildlife feeders and houses** to attract butterflies, ladybugs and bats. All of these kits are fun and easy to make for your own backyard; great as gifts and popular at craft shows. They're also rewarding projects to do with your kids, grandchildren or scout troops.

Most **birdhouse kits** are designed to attract specific types of birds – from the American Robin to the Yellow-Bellied Sapsucker. **Birdhouse** styles range from Classic Colonial and towering gazebos to double-decker and multi-family units. Virtually all are made of wood – rot-resistant cedar or alder, for example – and some require staining or painting. Most models have removable floors, sides and/or roofs for easy cleaning.

The **birdfeeder kits** are also easy to make! They attract a variety of fine-feathered friends to your yard, depending on the type of birdseed you use. Feeder kits range from classic hinged-roof designs to multi-hoppers and fly-through units.

Some of the kit manufacturers also offer a variety of non-kit **wildlife feeders and houses**. For example, you can purchase squirrel feeders, suet cages and ornate gazebo birdhouses in pre-assembled form. Also, if you're interested in creating more complex structures, you may want to review the "plans" listed at some of the participating **KitGuy** websites.

Kompleteness of Kits/Tools/Finishing: Most models include pre-cut and pre-drilled parts with all the necessary hardware for assembly, requiring just basic tools like a hammer and screwdriver. If you choose a kit that requires finishing with stain or paint, you'll need to supply those materials. Avoid using creosote as a preservative.

Skill: The expertise required to complete most of the birdhouse and birdfeeder kits is minimal. The rewards are immeasurable!

Price Range: Birdhouse and birdfeeder kits range from about \$10 to \$60, including shipping.

SEE SPECIFIC KITGUY PROFILES LISTED ON THE TOP RIGHT OF THIS PAGE WHICH WILL LINK YOU TO ALL THE BIRDHOUSE & BIRDFEEDER KITS AVAILABLE ONLINE.

Birdhouse, Birdfeeder & Wildlife Feeder Kits ▶ The Birdhouse Depot

The **Birdhouse Depot** offers an extensive line of cedar **birdhouses and birdfeeders**. They also sell **squirrel feeders, bat and ladybug houses**. Cedar is an excellent material for outdoor use because it resists rot and decay and the cedar aroma is a deterrent to insects, moths and other pests. You can use their clever ordering system to pick the model and the construction. For example, choose a "flat back", add a chimney, an extra perch or a cedar shake roof. Choose a single residence or a multiple-unit "apartment complex" **birdhouse**.

The flat-back **birdhouses** have one or more holes drilled in the back to allow for simple nail hanging. The other houses and feeders can be suspended using a metal clothes hanger. The overhanging roof type are designed to set on a flat surface or pole.

YOUR KIT MANUFACTURER:

Birdhouse, Birdfeeder & Wildlife Feeder Kits ▶ Colonial

Colonial has patterned their **birdfeeders** and **birdhouses** after some New England house designs. Individual cedar shake shingles make these houses very attractive and unusual. You can build a "saltbox" **birdhouse** to attract nuthatches and titmice. Or try the "covered bridge" **birdfeeder** that looks like - you guessed it - a covered bridge that is a tray feeder that holds seeds, nuts, grains, fruit and other similar bird foods. They also have a very interesting "carriage house" **birdfeeder** kit with basswood battens and trim and even a birch cupola.

These **Colonial** products are assembled with screws that allows removal of the base for easy cleaning. Because they are made of wood that needs to be painted you can dress them up in your favorite colors. They have been producing these kits for over 10 years and are located out East in Berlin, Massachusetts.

YOUR KIT MANUFACTURER:

Birdhouse, Birdfeeder & Wildlife Feeder Kits ▶ Birdhouse Kits

This manufacturer really is for the "birds and the bees". You can choose from three easy-to-assemble **birdhouses** and one **birdfeeder**. These cedar kits include a model called the "Cathedral" which is a sharp, A-frame design. Another one is called the "Suburban", which is specifically designed for Purple Martins and Bluebirds. Another one is call the "Tree House" which is a very basic unit for virtually any type of bird.

Finally, one can actually be used for different types of **wildlife** including **squirrels, bees and wasps**. In other words they suggest that you actually consider putting up an extra house for both the bees and the birds. These are great for Boy and Cub Scout badge work, family projects especially for bird and nature lovers. They are located in Toronto, Ontario, Canada.

YOUR KIT MANUFACTURER:

Birdhouse, Birdfeeder & Wildlife Feeder Kits ▶ Creative Native Designs

This kit manufacturer makes a beautiful Western Red Cedar **birdfeeder** that is handcrafted by the Salish Indians of Canada's Pacific Northwest. They call it the "**RainForest Bird Feeder**" and their design is based on 30-plus years of studying what would consist of the best **birdfeeder** design. It features a broad roof overhang that keeps the seed dry and the birds safe from prey while they are feeding. Special seed dividers in the feeder allows the use of non-mixed seeds to attract the birds you want. You use less seed because unique floor baffles minimize the amount of seed the birds scoop onto the ground.

This **birdfeeder** comes complete with a hanger, but the base of the units is 1 ½" thick, so you can also mount it to a pole. Because it is made of red cedar it does not require any finishing and will last for years. These **birdfeeders** are very high quality and the prices reflect that workmanship. They are located in British Columbia, Canada.

YOUR CATEGORY:

Boat Kits

Building a boat from a kit is truly a woodworker's dream. The styling of these boats, along with the quality of wood, allows you to produce what is **almost a piece of fine furniture** for the water. Virtually anyone with basic woodworking skills and tools can produce a **beautiful and functional watercraft** with relative ease. The variety of wooden boat kits available is remarkable: kayaks and canoes; rowboats, prams and skiffs; dinghies and tenders; drift boats and sail boats.

Many of the **boat kits** use Okoume, a plantation-grown African mahogany that appears a honey color in its natural state, but can be **stained beautifully** to any finish, as preferred. One manufacturer offers a special "lap stitch" design that allows novice woodworkers to build beautiful lap strake boats. Some of these boats are also designed so they can be easily propelled with an electric trolling motor or a small gas-powered outboard.

Besides the great satisfaction of building a wonderful boat, the **savings over** assembled boats can be significant, well over 50% – **\$1000 to \$2000** in some cases. You can build a real show piece since these boats can be finished with a wide variety of special stains, epoxies, varnishes and paints.

Kompleteness of Kits: Kits usually include all of the wooden parts necessary, brass and/or stainless steel hardware, fiberglass and taping (as needed), as well as all of the solid wood parts including deck beams, trim and rub rails, etc.

Tools: Basic woodworking tools are usually all that you need. A few that may be helpful include: hot melt glue gun, sanding block and sandpaper, wood file, carpenters level, wire cutters, contact cement.

Accessories: Hatches and rub rails, rudders and foot braces can be added in some cases. Sails and sailing rig parts, paddles and floatation safety devices are also available. A complete range of epoxy and fiberglass as well as other boat-building materials including brass fittings and screws, washers and more are available.

Price Range: The price for a boat kit starts at about \$600 and can go over a \$1000, plus shipping, depending on the type of boat and the options or accessories added. Many boat kits can be shipped UPS in 2 to 7 days for roughly \$50 or \$60 dollars.

SEE SPECIFIC KITGUY PROFILES LISTED ON THE TOP RIGHT OF THIS PAGE WHICH WILL LINK YOU TO ALL THE BOAT KITS AVAILABLE ONLINE.

Boat Kits ▶ Chesapeake Light Craft

Chesapeake Light Craft (CLC) offers one of the most beautiful lines of **kayaks** and **canoe kits** available anywhere. Their kits are so well designed that many finished boats are used for performance rowing. The okoume mahogany used in their kits allows you to stain and finish your boat with a gorgeous wood-grain luster. Their "lap stitch" construction allows you to build a lap strake hull – one of the most stylish looking boats around.

One, two, and three-person kayaks are available in sizes from 12' to 21' long. They have hard-chine, multi-chine and round-bottom boats. In addition to the **canoes** and **kayaks** they also offer **rowing / sailing skiffs**. One of their **skiffs** is 13' long with a 4' 2" beam. A sail can be added as an option to make this skiff a sailboat. Their kits are complete and include virtually everything you need to build your boat.

KitGuy Kwik Klik: **Gear up for paddling!**

Accessories include roof top carriers, seats, deck plates, compasses, cockpit covers, rowing accessories and paddles. They also offer a complete line of tools, epoxy, fiberglass, plywood, stains, paints and an assortment of building hardware such as brass screws, washers and nails.

According to **Chesapeake Light Craft**, "Over 7,000 CLC boats have been completed by amateur builders all over the world, many of who have had no previous woodworking experience."

Chesapeake Light Craft has been building boat kits since around 1992 and are located in Annapolis, Maryland.

YOUR KIT MANUFACTURER:

Boat Kits ▶ Flounder Bay Boat Lumber

Flounder Bay offers several different types of **boat kits: canoes, prams, dories, dinghies and wherries**. Canoe and pram kits include **"Puzzle-boat Kits"** that fit together like a puzzle – pieces press together and glue with epoxy putty. The pram is 8' long with a 4' beam. The canoe is 13' 3" with a 32" beam. A sailing package option is available for the pram.

Because of the puzzle-like configuration of the kit, the canoe, for example, ships in a box that is only about 2 ½' x 4' x 6". Puzzle boat kits are shipped complete, including parts cut to shape, supplies and most of the tools needed. According to the kit manufacturer, all you supply is a hammer and the final **paint**.

Get a **FREE SONY WALKMAN now and listen while you row!**

Flounder Bay Boat Lumber is located in Anacortes, Washington.

OTHER Flounder Bay PRODUCTS: Dory, pram, dinghy, and wherry kits in plywood strip and plank-on-frame construction.

Boat Kits ▶ Pygmy Boats

The **Pygmy Boat kit** line has over 17 different models of **kayaks, rowing skiffs, wherries and canoes**. They claim to be "the largest and oldest manufacturer of precision, precut plywood **kayak kits** in North America". They also promote that their **boat kits** are "**1/3 the price** and 30% lighter than comparable fiberglass boats".

Kayak kits include several features like: top grain mahogany, precision precut frames and large, roomy cockpits. They make **singles, doubles, and triples** including an excellent **10' kayak kit – great for children**. At their website, you can see how to build an ultra-light, superior **performance Pygmy kayak** in as little 70 hours, using a special "Stitch-N-Glue" kit construction process.

Their "**Wineglass Wherry**" is about 14' long and weighs about 90 lbs. A sail can be added to this boat as an option. They also have a 17' **canoe kit**. **Boat kits** include materials such as okoume plywood, ash and mahogany.

YOUR KIT MANUFACTURER:

Boat Kits ▶ Uncle John's

Uncle John's makes **boat kits in 3 styles: canoe, skiff (with sail option) and jon boat**. The **canoe** is available in lengths from 12' to over 15'. The small **skiff boat kits** can be used for either rowing or sailing or with a small motor. Their kits have the advantage of containing only the precut "difficult parts" – you supply the rest of the lumber and other simple supplies. So you can build one of their boats starting at **very reasonable prices**.

For example, precut components include stems and ribs, beveled and sanded, ready to be combined with the wood that you provide. Additional wood needed is ¼" plywood and 1" x 4" clear lumber for rub rails. The kits for the skiffs include the transom, seats, stern, and "knees". You provide additional materials, such as exterior plywood, clear lumber, screws, glue, and fiberglass materials.

They have recently added a flat-bottom "John Boat" in sizes from 10' to 11' 6" long and 45" beam. And, be sure to check out their **brand new "Cajun Wagon"** - **it is the coolest boat/wagon kombo ever!** This kit manufacturer is located in Sulphur, Louisiana.

YOUR CATEGORY:

Cabin and Cottage Kits

You can actually save time and money – and get the best quality – when you assemble your cottage or cabin from a kit! **KitGuy** offers a **variety of well-designed structures you can easily build for your own private hideaway** in the woods or by the lake.

Most cabin and cottage kits create structures of 1000 sq. ft. or less. We're not talking big homes here. But great hunting cabins or delightful family cottages that you can build quickly, then customize with porches, decks, lofts and more!

Choose from log or cedar construction. Most kits are traditional 2x4 and 2x6 frame construction that meets building, zoning and association codes. Many feature a post and beam roof system for vaulted or cathedral ceilings. One kit design enables you to expand the cabin into a year-round home, adding modules over time.

When you build from a kit, **you can save thousands of dollars and customize the structure to precisely meet your needs**. You'll also save on labor and material costs, with minimal waste. Some kit manufacturers provide financing up to a certain percent. Be sure to check local zoning codes to see if a building permit is required for your property.

Kompleteness of Kits/Finishing: Most kits include pre-cut wall and flooring systems with pre-hung doors and windows. Packages come ready to nail together with panels and components clearly marked, plus instructions for easy assembly. Some packages include all the nails, joist hangers, beam hangers, frame anchors, glues and caulking materials required. Plans are fully detailed for permit and construction needs. Materials to build the foundation are typically not included. In all cases, finishing materials like paint, stain, bricks or vinyl siding are extra.

Tools: Cottages and cabins can be assembled using traditional hand and power tools. You'll need a power source nearby. Also, consider your needs for plumbing, heating and electrical wiring and incorporate these into your plans.

Skill: You'll need some expertise and proficiency in shed or home construction. Site and foundation planning also requires some special skills, but most kit manufacturers offer guidelines to help you in these areas. The biggest benefit of building your cottage or cabin from a kit is that the manufacturers provide precise, computer-designed plans, volume-discount materials sourcing, cutting and pre-fabricating. And they're willing to provide technical expertise if you need it. Depending how long you work each day, most cottages and cabins can be built in about 1-2 weeks with a crew of 4.

Price Range: Prices range from \$6,000 for a 12' x 12' bunkhouse cabin to \$30,000 for a complete cottage home. Shipping is extra and quoted at the time of your order. Custom orders and accessories are available at additional costs.

Shipping: Depending on the season, kits are usually delivered within 6-12 weeks. If you're placing a custom order, ask about delivery timing.

YOUR KIT MANUFACTURER:

Cottage and Cabin Kits ▶ EZ Home

EZ Home makes a real nice kit for building a small **cabin**, lakefront **cottage** or country home. These kits are entirely pre-cut and pre-built with a panelized construction that makes assembly quick and easy. Two different siding packages are offered: **cedar or log cabin style**.

The materials are pre-cut and the components are number-coded for easy assembly of interior walls, decks, porches, etc. All the nails, joist hangers, beam hangers, frame anchors, glues and caulking required to erect the package are included. The windows and doors are pre-hung and installed on the wall systems.

If you choose a cedar home, **EZ Home** will even pre-stain and pre-install the cedar siding on the walls. The cedar channel siding option uses 1"x 6" cedar. The "log-sided" homes use a special 2" x 8" log siding to give them the look of a real log home. According to this kit manufacturer, some of the models can be assembled in less than a day.

KitGuy Kwik Klik: Be sure to bring along a good pair of **binoculars** or a **digital camera** to capture all of nature's glory!

EZ Home has 21 years of experience and is located in Audubon, Pennsylvania.

Kits start at around \$15,800 plus shipping

Shipping can add around \$2500 or more to the cost.

Note: Prices are estimates in US Dollars - features, specifications and prices are subject to change - check with kit manufacturer.

ASSEMBLY INFORMATION

TOP ▲

Tools Required: Carpenter tools including but not limited to a tape measure, square, skill saw, level, hammer, sledgehammer. And, remember, if you need tools, you can get all your **tools online now**.

Skills Needed: Medium to high carpenter

Areas of Difficulty: You are responsible for the foundation

One of the difficulties in assembly is raising the walls. In some instances some of the larger cabin kits would require either a lot of manpower or better yet a boom truck to be able to lift and place the large walls into place.

Estimated Time: According to this manufacturer a crew of four people can construct a 1,600 sq. ft. kit in approximately two weeks.

Finishing Required: Kits are also pre-stained in the color of your choice.

(Hold that hammer...Is this **the best home improvement site on the internet** - or what?)

Cabin & Cottage Kits ▶ Shelter-Kit

If you are looking for a simple, easy-to-assemble and economical **cabin**, this might just be your ticket. **Shelter-Kit** makes four different styles of **kit buildings**. The most economical one is what they call a "Unit One". A Unit One is a unique **cabin** because it can be enlarged in any direction, at any time. Standard modules are 12' square and a 9' x 12' porch can be added. Modules can be combined to create an almost infinite number of shapes and sizes. Materials used include fir, spruce and pine.

Unit Ones are ideal for **vacation cabins, ski lodges, studios and guesthouses**. Several modules can be combined to make a cozy year-round home. They are also adaptable for commercial uses such as **bunkhouses for camps, ski trail shelters, pool cabanas** and more.

(Psst...Is this **the best home improvement site on the internet** - or what?)

The Unit One kit contains everything needed to complete a weather-tight shell on your foundation: precut and predrilled lumber, flooring, siding, roofing, trim, nails and screws. Galvanized steel bolts and custom-machined hardware fasten together the key structural components. A standard kit also includes a 12 ft. wide sliding glass door and a 5 ft. x 3 ft. sliding window. The kit includes an illustrated construction manual and all materials are precut to precise dimensions, labeled and packaged in easily identified bundles that two people can carry.

Shelter-Kit Unit Ones have been in production for over 30 years. **Shelter-Kit** is located in Tilton, New Hampshire.

Summerwood is your "one-stop kit shop" for **sheds, cabanas, gazebos, playhouses** and custom structures. They also offer an excellent line of small **cabins, "bunkies" and cottages**. Their 12' square **Bunkie** is a popular kit. You can add features to it like dormers, French doors and a bar window with a flower box. You can also add a porch so that the **cabin** area is 8 ft. x 12 ft. and the porch area is 4 ft. x 12 ft. A 14' square **Bunkie** is also available with a 5 ft. x 14 ft. porch and a 9 ft. x 14 ft. cabin.

Kits are available either precut or pre-assembled. In the precut kits, all components are precut – doors and windows are pre-assembled. In the pre-assembled kit, the components are pre-assembled and the modules are ready to erect at your site. The Bunkie comes standard with spruce framing, a plywood floor and OSB roof sheathing. A cedar framing, floor and ceiling package is also available.

KitGuy Kwik Klik: Consider a komplement of unique, **handcrafted accessories!**

Instructional videotapes are included with their products or can be purchased from them beforehand. **Summerwood** is located in Toronto, Ontario, Canada.

Cabin and Cottage Kits ▶ Wilderness Cabin Company

According to this manufacturer the “**Wilderness Cabin Company** makes **cabin** kits that produce attractive, affordable and easy to build cabins.” This company offers a number of cozy **cabins** that you can build yourself, quite economically. Due to the great product range of this manufacturer, you can build a cabin ranging from 192 sq.ft. up to 1,611 sq.ft. and just about everything in between. This company specializes in these type of relatively small **cottages** – and that's all they do.

Standard **cabin kits** are constructed of cedar siding and metal roofs. They are shell type structures with interior walls. Packages do not include interior finishing such as insulation, electrical, plumbing, cabinets, flooring, painting, etc. You are responsible for the foundation. A popular model is their Lavallee – an 899 sq. ft. model that consists of a main floor and an upper level. Even the staircase is prefabricated for it.

KitGuy Kwik Klik: **Some sunny cottage accents for your new home in the woods!**

These are only available to Canadian and U.S. residents. They have been building **cabin kits** for about 4 years and are based in British Columbia, Canada

PRODUCTS AND PRICING

TOP ▲

Prices for the smallest units start at \$5,780 and the 1,611 sq. ft. cabin is \$34,500 plus shipping. For example, freight on the Lavallee model kit is approximately \$2,400 so for around \$21,800 you can have a complete 899 sq. ft. cabin kit delivered to your door.

They do offer financing through a mortgage corporation listed at their web site.

Note: Prices are estimates in US Dollars - features, specifications and prices are subject to change - check with kit manufacturer.

Availability: As much as 12 weeks or so, check with kit manufacturer

(Psst...we know you need a kool, new pair of **sunglasses!**)

ASSEMBLY INFORMATION

TOP ▲

Tools Required: Carpenter tools - tape measure, square, skill saw, level, hammer, sledgehammer. Air tools can speed up the assembly process considerably. And, you can get all your **tools online now**.

Skills Needed: Medium to high carpenter

Areas of Difficulty: Foundation, roofing

One of the difficulties in assembly is raising the walls. In some instances some of the larger cabin kits would require either a lot of manpower or better yet a boom truck to be able to lift and place the large walls into place.

Estimated Time: According to the kit manufacturer, a crew of four can assemble the Lavallee in

approximately two weeks.

Finishing Required: Kits are also pre-stained in the color of your choice. Insulation, electrical, plumbing, cabinets, flooring, interior painting and staining is not included.

Note: Kits up to 899 sq. ft. (which is the size of the "Lavallee" model) are precut, assembled-by-number kits. Packages over 899 sq. ft. are material packages and not precut like the smaller units.

PAYMENT OPTIONS

TOP 

Orders require a 30% deposit - balance is due for delivery. Check with kit manufacturer for complete details.

YOUR CATEGORY:

Canoe & Kayak Kits

The popularity and sport of **kayaking and canoeing** has grown tremendously in recent years estimates say over 700%! **Kayaks and canoes** are used by photographers, fly fisherman and bird watchers. among other things. They're also great for hobby and exercise.

Kayaks range from about 10' to 18' long – single, double or triple person. Canoes range from about 12' to 16' long. Most of these kit boats are made from wood since wood is ten times stiffer than fiberglass by weight and nearly six times stiffer than epoxy composites. They require much less energy to move sleekly through the water. They also handle rough seas and fast paddling and won't get brittle with age.

Many of these boat kits have been produced for years and have been refined so that they are the easiest to build of any boat kits available. Their sleek wood grain styling is very attractive.

More On Boat Kits

Building a boat from a kit is truly a woodworker's dream. The styling of these boats, along with the quality of wood used, allows you to produce what is almost **a piece of fine furniture for the water**. Virtually anyone with basic woodworking skills and tools can produce a beautiful and functional watercraft with relative ease. The variety of wooden boat kits available is remarkable: kayaks and canoes; rowboats and skiffs; dinghies, prams, and tenders; drift boats and sail boats.

Many of the boat kits use Okoume, a plantation-grown African mahogany that appears a honey color in its natural state, but can be stained beautifully to any finish, as preferred. One manufacturer offers a special "lap stitch" design that allows novice woodworkers to build beautiful lap strake boats. Some of these boats are also designed so they can be easily propelled with an electric trolling motor or a small gas-powered outboard.

Besides the great satisfaction of building a wonderful boat, the savings over assembled boats can be significant – well over 50% – as much as \$1000 to \$2000 in some cases. You can build a real show piece since these boats can be finished with a wide variety of special stains, epoxies, varnishes and paints.

Kompleteness of Kits: Kits usually include all of the wooden parts necessary, brass and/or stainless steel hardware, fiberglass and taping (as needed), as well as all of the solid wood parts including deck beams, trim and rub rails, etc.

Tools: Basic woodworking tools are usually all that you need. Some that may be helpful include: hot melt glue gun, sanding block and sandpaper, wood file, carpenters level, wire cutters, contact cement.

Accessories: Hatches and rub rails, rudders and foot braces can be added in some cases. Sails and sailing rig parts, paddles and floatation safety devices are also available. A complete range of epoxy and fiberglass as well as other boat-building materials including brass fittings and screws, washers and more are available.

Price Range: The price for a boat kit starts at about \$600 and can go over a \$1000, plus shipping, depending on the type of boat and the options or accessories added. Many boat kits can be shipped UPS in 2-7 days for roughly \$50 or \$60 dollars.

YOUR CATEGORY:

Dinghy, Tender, Pram & Rowboat Kits

An excellent choice for a **dinghy or tender** is a 10' boat kit that is available with a 48" beam. Displacement is 300 lbs. and she only weighs about 65 lbs. The boat builders package includes all the required woods, epoxy, Fiberglas, screws, stem band, varnish, oarlocks and sockets, and is only \$1,100. There is another boat that is an 8' model of that same version, 8' long and 48" wide, the displacement is also 300 lbs, but the boat finished only weighs about 50 lbs. This would be excellent for a dinghy and a yacht. This boat is \$895.

One skiff kit can either be used as a row boat or equipped one or two sails. Another choice is a "wherry" – a classic rowing boat. The wine glass wherry has a wine glass shaped transom (which is the tail end or back end of the boat, perpendicular to the water, typically flat at the back end) with the smooth waterline of a classic rowing boat.

Some even smaller boats are available such as the 7'7" long plywood pram that can be built to be used as either a rowing or sailing pram. This boat sells for \$739 but the oars and optional sail are additional. There is a 9' 8 1/2" long sailing pram with a 4' beam and a 16' 11" mast and 54 sq. ft. of sail. The finished weight is only can carry over 500 lbs.

The drift boat is a specialty kind of boat available is. These boats have kind of a banana shape and are available in sizes that are about 16' to 17 1/2' long. They are wide-bottom boats with up to a 54" beam. The 16' model with 48" is the most popular – in the marine plywood version the kit is around \$950. Close to this drift boat design is a rowboat. A standard 12' rowboat with the fir marine plywood kit is \$745.

The difference between a rowboat and a pram is that the pram has fairly high sides and a squared off bow and stern or transom. The pram is a great all around river fishing boat. A 12' pram is a good boat for two people – a two-fisherman boat.

YOUR KIT MANUFACTURER:

[Ceiling Fan Kits](#) ▶ Builder Lighting

BUILDER LIGHTING has one of the best offerings of **ceiling fan kits** online. You can use their unique and easy three-step process to customize the kit you want. You simply choose the type of fan and color that you want – then blades – and then a light kit – that's it! Some unique **light kits** are available – like carousels or racecars for kids' rooms. There are single lights and multiple light units. Some lights are swivel spot lights that can be pointed in different directions. Fan blades are solid colors, wood grain and some finishes that look like marble.

Optional wall switches with dimmers and variable fan speed controls are available. For added convenience, you can get an optional remote control with some kits. This kit manufacturer has very competitive prices and they offer the highest quality brands. These **ceiling fan kits** come complete and can be installed in just a couple of hours. This kit manufacturer also has a number of other lighting fixtures available for your home, so you can match your **ceiling fan** to other light fixtures too.

(Hold that hammer...Is this **the best home improvement site on the internet** - or what?)

They have been in business since 1971 and are located in Edmond, Oklahoma.

YOUR CATEGORY:

Ceiling Fan Kits

Ideal for beginners, as well as more accomplished do-it-yourselfers, **ceiling fan kits** offer rewards that go beyond the satisfaction of assembly and installation.

Ceiling fans enhance the beauty of almost any room. What's more, they help pay for themselves in energy efficiency. **Ceiling fans** provide a light, cooling breeze during the summer and, in winter, they work to maintain even temperatures throughout the room.

Attractive and efficient, it's no wonder they're a popular choice for bathrooms, bedrooms, dining rooms, kitchens, living rooms, porches and recreation rooms.

KitGuy offers easy, online access to ceiling fans from leading manufacturers including **Casablanca**, **Craftmade**, **Emerson**, **Fanimation**, **Hunter**, **Minka Aire**, **Modern Fan** and **Monte Carlo**. And, from them, you can choose a variety of kits with a many options.

In deciding which is right for you, you'll need to consider:

- Style: Select classic, contemporary, European, mission or other styles in brass, chrome or steel with lacquer, painted or powder-coat finishes.
- Size/Specifications: Choose various spans (typically 40 to 60 inches), blade pitches and down rod lengths.
- Motors: Opt for standard- or heavy-duty, reversible, variable-speed and/or specialty motors (e.g., for high-moisture areas).
- Blades: Specify steel or a variety of woods that are painted, clear-coated or unfinished.
- Lighting: Select direct or indirect lighting, including single, multiple and halogen fixtures.
- Controls: Consider traditional pull-chain, wall-mount or remote controls, many of which feature light dimmers.

Here are some other common considerations in regard to ordering ceiling fan kits:

Price Range: Kits are priced from as low as \$150 to more than \$500, with most falling within the \$200 to \$300 range.

Kompleteness of Kits: Most kits come complete with all parts, plus easy-to-follow instructions.

Tools: For assembly, you'll need a screwdriver and pliers, plus a ladder for installation.

Finishing: Most motors and fan blades come pre-finished; some kits, however, allow you to order

unfinished wood blades.

Skill: Assembly is primarily a screw -together operation; installation requires basic electrical skills. Readily accomplished by a single worker, total assembly and installation time is about two to three hours.

SEE SPECIFIC KITGUY PROFILES LISTED ON THE TOP RIGHT OF THIS PAGE WHICH WILL LINK YOU TO ALL THE CEILING FAN KITS AVAILABLE ONLINE.

Computer and Electronic Kits

Are you into gadgets and gizmos? Like a pinhole camera or voice recorder? Do you want to save hundreds of dollars by assembling your own computer? With your own specified amounts of memory, processing speed and peripherals? **KitGuy** offers a **stunning array of computer and electronic kits** so you can build just about anything that sparks your fancy!

PC kits come with all the necessary hardware and software, professional assembly instructions and technical support. You'll build one of the most solid and reliable systems that you could ever hope to buy or use. At significant savings! And, with all the money you'll save, why not pick up a **digital camera** or any number of **electronic extras** to enhance your new PC!

Want to build an **alarm/siren system, timer, telephone, robot, fish caller, metal detector, spy cam, radio or decoder**? You'll find them all here!

(Psst...Klick here for some reallly great **FREE SOFTWARE!**)

Computer and electronic kits are great for your own personal use and enjoyment. They're also great for gifts and educational instruction. Kit builders learn theory of operation and basic electronic schematics, LCD technology and more. All this, in addition to the fun and fascination of building your own gizmo!

KitGuy Kwik Klik: **A great place for all your computer accessories !**

Kompleteness of Kits: Most kits come with everything you'll need. Parts, instructions, schematics and toll-free help lines are available.

KitGuy Kwik Klik: Once complete, be sure to enter the 21st Century in style with a **variety of accessories** to komplement your PC as well as your wardrobe!

Tools: You'll want to be familiar with soldering equipment. Other than that, all you'll need is needle-nose pliers, a magnifying glass, proper lighting, vises and clamps on your workbench and vise-grip pliers.

Skill: **KitGuy** suggests that you build one of the simpler kits first. Build your confidence; then move on to the more advanced kits. You need to be comfortable working with minute, intricate parts.

Price Range: Pricing of kits is about equal to the variety and assortment available! Electronic kits start at about \$10 and go to several hundred dollars. Building your own high-powered computer, with all of the accessories, can usually be had for under \$1000. A home or car alarm goes for \$17.95. A telephone kit is \$19.95. Fiber optics educational kits start at \$26.96.

Shipping: Most manufacturers ship anywhere in the world; international shipping charges are minimal (\$9.95-\$12.50).

(Psst... you'll look great in a cool new pair of **sunglasses!**)

Computer and Electronic Kits

► Computer Works

Computer Works supplies you with all the basic ingredients to build your own **personal computer**. According to **Computer Works**, **PCKit** is a low-cost alternative to the other brands on the market. Kits contain name brand components like IBM, Toshiba, Intel, 3-COM, and Microsoft so you can build a high performance **personal computer** with the highest reliability and stability.

The basic **PCKit** allows you to build a computer platform that you can grow as your computer needs change. This is an exceptional value for the person who wants to learn about the "guts" of a computer and how it works.

KitGuy Kwik Klik: We're talking **great new laptops here!**

You can also purchase a monitor to complete the system. **Computer Works** claims to have almost 20 years of experience working on, designing, constructing and servicing PCs. **Computer Works** is located in Northport, New York.
